

EVOS Allergen Table

Since 1994, EVOS has voluntarily listed nutrition and allergen information for our guests, obtained from our suppliers and independent analysis. Our nutrition and allergen information is listed in a way that gives you transparency and flexibility. By breaking down each ingredient, you can make choices to fit your goals or meet your specific dietary needs. We make all foods fresh-to-order, so simply tell us when you place an order if you would like something made differently to fit your needs. Have a Healthy Day!

DISCLAIMER: Food manufacturers may change formulations at any time and without notice. EVOS guests with allergies need to be aware of this risk. Variations may occur due to differences in suppliers, ingredient substitutions, and/or product assembly at each restaurant. EVOS, its franchisees and employees do not assume responsibility for a particular sensitivity or allergy to any food product provided in our restaurants. EVOS restaurants are not an allergen free facility.

*For many people, soy oil and soy lecithin (a common emulsifier) are considered to be of little to no consequence with respect to allergies because they include very little protein. But both of these ingredients have been known to cause allergic reactions in rare instances. Discuss the risks and benefits of using them with your doctor.
